

modules.config.device  
\_config.DeviceConfig.load  
\_from\_file

modules.config.device  
\_config.DeviceConfig.load  
\_from\_string

modules.config.device  
\_config.DeviceConfig.\_parse

```
graph LR; A[modules.config.device_config.DeviceConfig.load_from_file] --> C[modules.config.device_config.DeviceConfig._parse]; B[modules.config.device_config.DeviceConfig.load_from_string] --> C;
```

The diagram illustrates a dependency or inheritance relationship. Two source functions, 'modules.config.device\_config.DeviceConfig.load\_from\_file' and 'modules.config.device\_config.DeviceConfig.load\_from\_string', are shown in white boxes on the left. Blue arrows point from each of these source functions to a single target function, 'modules.config.device\_config.DeviceConfig.\_parse', which is shown in a gray box on the right.
