_write_command

```
graph LR; A[modules.io.i8275.I8275.io_write] --> D[modules.io.i8275.I8275._write_command]; B[modules.io.i8276.I8276.io_write] --> D; C[modules.io.i8279.I8279.io_write] --> D; E[modules.io.lcd1602.LCD1602.io_write] --> D;
```

The diagram illustrates a central function, `modules.io.i8275.I8275._write_command`, which is the destination for four other functions. These functions are arranged vertically on the left: `modules.io.i8275.I8275.io_write`, `modules.io.i8276.I8276.io_write`, `modules.io.i8279.I8279.io_write`, and `modules.io.lcd1602.LCD1602.io_write`. Blue arrows point from each of these source functions to the target function on the right.
