```
graph LR; A[modules.io.i8276.I8276.io_write] --> D[modules.io.i8276.I8276._write_data]; B[modules.io.lcd1602.LCD1602.io_write] --> D; C[modules.io.tft8080.TFT8080.io_write] --> D;
```

The diagram illustrates a dependency or data flow where three separate modules (I8276, LCD1602, and TFT8080) all utilize a common write data function provided by the I8276 module. The source functions are in white boxes, and the target function is in a grey box.
